

CONTRIBUTORS

Bryan R. Early is an assistant professor in the Political Science and Public Administration & Policy Departments at the University at Albany, State University of New York. He previously served as a fellow with the Dubai Initiative at Harvard University's Belfer Center for Science and International Affairs and as a research associate with the University of Georgia's Center for International Trade and Security. His research focuses encompass nuclear proliferation and arms control, terrorism, and economic sanctions, and his past work has been published in *International Studies Quarterly*, *Foreign Policy Analysis*, and *World Affairs*. Early earned his PhD in political science from the University of Georgia in 2009.

Sara Kristine Eriksen is a researcher at the Norwegian Defence Research Establishment (NDRE). She has a master's degree in political science from the University of Oslo and has also studied Arabic language. In 2008 she participated as a speaker at the Third London Conference on a Middle East Weapons of Mass Destruction Free Zone at the School of Oriental and African Studies. She authored the 2007 report "Establishing a Weapons of Mass Destruction Free Zone in the Middle East: Prospects and Challenges" for NDRE and coauthored with Bjørn Erik Rasch the 2009 article "Single- or Double-Marking of Student Examination Papers? An Experiment on Social Interaction."

Torrey Froscher is a national security consultant with CENTRA Technology, Inc. Previously, he focused on analysis of foreign weapons programs at the Central Intelligence Agency for more than thirty-five years. Before he left government service in 2006, Froscher was a deputy director in the CIA's Center for Weapons Intelligence, Nonproliferation, and Arms Control. Earlier in his career he headed analytic units on nuclear test monitoring, nuclear proliferation, and nuclear, biological, and chemical weapons. He also served as chief of analysis for the Director of Central Intelligence Nonproliferation Center. His article, "Anticipating Nuclear Proliferation: Insights from the Past," appeared in the November 2006 issue of the *Nonproliferation Review*.

Robert Golan-Vilella is a senior at Yale University. He is double-majoring in history and international studies. He worked as research assistant in the International Organizations and Nonproliferation Program at the James Martin Center for Nonproliferation Studies during the summer of 2009.

Linda Mari Holøien is a researcher at the Norwegian Defence Research Establishment (NDRE). She has a master's degree in political science from the Norwegian University of Technology and Science and is the author of the 2007 NDRE report, "Weapons of Mass Destruction Free Zones in the Middle East."

Liviu Horovitz is a former researcher with the James Martin Center for Nonproliferation Studies in Monterey, California, and was a Fulbright fellow specializing in nonproliferation studies at the Monterey Institute of International Studies, where he

received a master's degree in international policy studies. His area of expertise covers international nonproliferation and disarmament organizations and regimes. He holds a degree in international relations from the University of Dresden, Germany.

Daniel Johnson is currently finishing a master's degree in international policy and nonproliferation studies at the Monterey Institute of International Studies. Previously, he worked as a research assistant at the James Martin Center for Nonproliferation Studies, where he wrote country profiles on nuclear and ballistic missile programs. In the spring of 2010 he interned with the World Institute for Nuclear Security. Johnson began a fellowship with the U.S. National Nuclear Security Administration's Nonproliferation Graduate Fellowship Program in June 2010.

Togzhan Kassenova is senior research associate at the Center for International Trade and Security. She was a postdoctoral fellow at the James Martin Center for Nonproliferation Studies and an adjunct faculty member at the Monterey Institute of International Studies from 2007 to 2008. Her areas of expertise include cooperative threat reduction programs, WMD proliferation issues in Central Asia, and strategic trade controls in East Asia. She holds a doctorate in politics from the University of Leeds, a master's degree in Euro-Asian studies from the University of Reading, and a bachelor's degree in international relations from Almaty State University in Kazakhstan. She is author of *From Antagonism to Partnership: The Uneasy Path of the U.S.-Russian Cooperative Threat Reduction* (Ibidem-Verlag, 2007).

Alexander Kapatadze is completing his PhD dissertation at the School of International Relations, St. Andrews University. Before attending St. Andrews, he extensively researched organized crime as an associate research fellow at the Georgia Office of American University's Transnational Crime and Corruption Center. His research interests include criminal networks, informal politics and corruption, and international relations of the Caucasus and Central Asia. He has authored several articles and book chapters on criminality, smuggling, and policing in post-Soviet Eurasia.

Patricia M. Lewis is the deputy director and scientist-in-residence at the James Martin Center for Nonproliferation Studies at the Monterey Institute of International Studies. Previously, she was director of the UN Institute for Disarmament Research and of the Verification Research and Training Centre in London. Lewis holds a bachelor's in physics from the University of Manchester and a PhD in nuclear structure physics from the University of Birmingham. She lectured in physics at the University of Auckland in New Zealand, conducting research at the Australian National University. Lewis was a member of the Tokyo Forum for Nuclear Non-Proliferation and Disarmament, commissioner on the Weapons of Mass Destruction (Blix) Commission, and is an advisor to the International Commission on Nuclear Nonproliferation and Disarmament. She was the 2009 recipient of the American Physical Society's Joseph A. Burton Award for her contributions to arms control and international security.

Amanda Moodie is a graduate student at the Fletcher School of Law and Diplomacy at Tufts University, where she is working toward a master's degree in law and diplomacy, with concentrations in international security studies and international negotiation and conflict resolution. Prior to attending Fletcher, she was a national security analyst at CSC, supporting the International Counterproliferation Program run by the Defense Threat Reduction Agency. A 2008 graduate of Duke University, she has previously held internships at the James Martin Center for Nonproliferation Studies and the U.S. office of the International Institute of Strategic Studies.

Michael Moodie is a senior national security advisor at CSC. He also serves as executive editor of *WMD Insights* and manager of the Proliferation Community of Interest of the Global Futures Forum. In the policy research community, he has served as president of the Chemical and Biological Arms Control Institute and as a senior advisor to the president at the Center for Strategic and International Studies. He is also a former assistant director for multilateral affairs at the U.S. Arms Control and Disarmament Agency and special assistant to the ambassador at the U.S. Mission to NATO.

Gregory L. Schulte was U.S. ambassador to the International Atomic Energy Agency and the United Nations in Vienna from 2005 to 2009, helping to report Iran to the UN Security Council, implement the U.S. nuclear cooperation agreement with India, and advance establishment of international nuclear fuel banks. He served three tours in the White House under presidents Bill Clinton and George W. Bush, working on the Balkans and serving as executive secretary to the National Security Council. He served six years at NATO Headquarters as director for nuclear planning and director for crisis management and operations. He started public service in 1983 as a presidential management intern in the Pentagon. From July 2009 to May 2010, he was senior visiting fellow at the Center for the Study of Weapons of Mass Destruction at the National Defense University.

Fabian Sievert currently works for the Terrorism Research and Education Program at the Monterey Institute of International Studies (MIIS). He earned his master's degree in international policy studies at MIIS, specializing in nonproliferation and terrorism studies, and previously worked as a research assistant at the James Martin Center for Nonproliferation Studies.

Şebnem Udum is a PhD candidate in the Department of International Relations at Bilkent University; her dissertation analyzes current nuclear energy issues in Turkey. She holds a master's degree in international policy studies from the Monterey Institute of International Studies, and from 2002 to 2003 she worked as a research associate at the James Martin Center for Nonproliferation Studies. Her areas of expertise include Turkish foreign policy and security policy, nonproliferation, and energy issues.

Yun Zhou is a research fellow at the Belfer Center for Science and International Affairs at Harvard University's John F. Kennedy School of Government. She was formerly a science and technology fellow at the Center of International and Security Studies at

Maryland, in the School of Public Policy at the University of Maryland. She received her PhD in nuclear engineering from the University of California–Berkeley and has published articles in a wide variety of journals, including *Nuclear Engineering and Design* and *Energy Security*.
